Subject: settlement

What a bunch of lawyer BULLS**T! Microsoft has a strangle hold on the entire computer market, and anyone who denies that is not living in the real world. I can not go out and buy a new computer today without THE operating system that Microsoft has chosen for me! Please include a stripped down version of Windows in the settlement! This would be a step in the right direction. If nothing else stop Microsoft from strong arming the computer manufactures into loading the OS they choose onto new computers, please leave the choice in the public's hands! It sucks that I cannot choose the OS I want! Thanks for listening...
